

Collax Platform Server

A quick overview

- › **What do you actually need in an IT solution for your company?**

- › **Do you need specific functions from different servers?**

- › **Why not custom build yourself your own server?**
 - Too complicated???
 - Too expensive???
 - Takes too long???

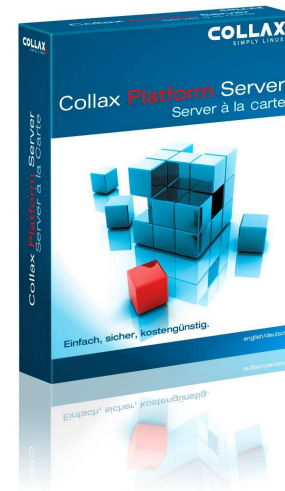

- › **Collax has a good solution:**
 - The Collax Platform Server is a fully customisable server solution where you only pay for the functionality you actually use

 - It scales both in functionality and load as your company grows in size and requirements.

- › **The first step to a fully customisable server architecture is free:**
 - The Collax Platform Server

- › **The Collax Platform Server gives you a base platform to build your custom server on:**
 - First a single disk transforms any machine into a Collax Platform Server
 - Next decide what you want your new Collax server to do (select one or more):
 - Mail Security
 - Net Security
 - Web Security
 - E-Mail Archive
 - Surf Protection
 - Groupware
 - Virtualization
 - Network Storage
 - Web Application
 - Monitoring Solution
 - Net Backup
 - AntiVir
 - Virus Protection
 - Communication

› The Collax Platform Server is the base for all your tailored server requirements:

- Secure
 - Complete dynamic security built into each server:
The server is completely locked down until modules are added or configuration changes are made. It adapts dynamically as it grows

 - Integrates into your existing mechanisms
 - PDC
 - NT domain
 - Active Directory – Comes complete with Active Directory proxy

- Dynamic Administration Interface
 - Runs in a browser (AJAX)
 - Can be accessed from anywhere securely
 - Adapts as modules are plugged in

- Simple Maintenance
 - Point and click addition of new modules
 - Update of platform server and modules

- **The Collax Platform Server is the base for all your tailored server requirements :**
 - Scalable
 - Built to grow from 5 users to hundreds of users
 - Built to run 24/7
 - Business Resilient Solution
 - Self monitoring and reporting
 - Self backup and restore built in
 - Backup: Incremental, differentially or completely
 - Restore: full/disaster recovery or file based
 - Ready to go on any network:
 - Networking:
 - DNS
 - DHCP
 - Tagged VLAN
 - ...
- **A solid, reliable and scalable platform that will meet any of your needs now or in the future**
